

Hinkley Connection Project:

Notice of traffic management on A370 Weston Road for reinstatement works

As part of our ongoing reinstatement works, we will be restoring a temporary access point on the A370 Weston Road, which was used during construction of the Hinkley Connection Project. We expect works to be ongoing from **3 November to 28 November 2025**.

To carry out this work safely, three-way traffic lights will be in place 24 hours a day for the duration of works. Our contractors, Balfour Beatty, will be working onsite during the hours of **7:30am and 5:00pm**. Outside these hours, the traffic lights will remain operational for safety reasons.

The traffic management will be located in close proximity to Moorland Park bus stops, resulting in the suspension of both bus stops throughout the duration of works. The adjacent pedestrian footpath will also be closed throughout this period, with Traffic Management Operatives present during working hours to assist pedestrians in safely navigating around the works area.

Please note that timings may change due to adverse weather or unforeseen circumstances.
